

AHMED NASHAAT

Backend Developer | Node.js | APIs | Web Applications

01279883125 | ahmadnashat04@gmail.com | Alexandria, Egypt

[GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Backend-focused developer with hands-on experience building APIs, backend infrastructure, and scalable web products using Node.js, Express.js, MongoDB, and SQL. Full-stack development experience at PROGRAM and technical leadership at Knzify. Strong in communication, teamwork, problem-solving, and translating product requirements into reliable software.

CORE COMPETENCIES

Backend Development • REST APIs • Node.js • Express.js • MongoDB • SQL • JavaScript • Python • Java • Full-Stack Development • API Integration • Business Logic • Data Management • SaaS Platforms • Software Architecture • Git • Team Leadership • Problem Solving

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, Embedded C++

Backend & Databases: Node.js, Express.js, MongoDB, SQL

Web & Tools: HTML, CSS, Git, PyQt6, Arduino, SHA-256

PROFESSIONAL EXPERIENCE

Co-Founder & Head of Development

Knzify | Alexandria, Egypt | Aug 2026–Present

- Define technical vision and lead the transition toward a scalable SaaS platform.
- Architect backend infrastructure, APIs, platform capabilities, and site-building products.
- Lead technical execution, architecture reviews, engineering workflows, and product feasibility decisions.

Full-Stack Developer

PROGRAM | Alexandria, Egypt | Jul 2026–Sep 2026

- Built and shipped features for PROGRAM from the ground up, with a primary focus on Node.js backend development.
- Worked across backend and frontend layers to connect product requirements with reliable user-facing functionality.
- Collaborated with the team to learn quickly, resolve issues, and deliver production-minded improvements.

Cloud Essentials Intern

National Telecommunication Institute (NTI) | Alexandria, Egypt | Jul 2026–Aug 2026

- Developed foundations in cloud computing, virtualization, networking, cloud services, security, and modern infrastructure.

PROJECTS

Secure User Management System

Python, PyQt6, SHA-256

- Built a desktop user-management application with PyQt6 and modular object-oriented architecture.
- Implemented SHA-256 password hashing so credentials are not stored in plain text.
- Added password-strength validation and local CSV persistence with dedicated authentication and database modules.

PROGRAM LMS Platform

Node.js, Express.js, MongoDB, JavaScript

- Contributed to building a learning management platform from the ground up.
- Focused primarily on backend development with Node.js, including APIs, business logic, and data management.
- Worked across frontend and backend layers to deliver connected, user-facing product features.

EDUCATION

B.Sc. Computer Science – Software Industry & Multimedia

Alexandria University | 2025–2029

CERTIFICATIONS

Database Fundamentals (MaharaTech) • Introduction to Network Security • Cloud Essentials • Cybersecurity Foundations • Networking Foundations: Local Area Networks
